REPORT ON

TIMELY REPORTING SCHEME

TAMIL NADU

2012 - 2013

Fasli -1422

PRINCIPAL SECRETARY/COMMISSIONER

DEPARTMENT OF ECONOMICS AND

STATISTICS

CHENNAI - 600 006.

PREFACE

Timely Reporting Scheme being one of the component of “Improvement of Agricultural Statistics”, is implemented in Tamil Nadu as a centrally sponsored scheme fully funded by Government of India with the aim of estimating the area under nine principal crops and the Land use pattern in the state.

This report contains results of the survey conducted during the year 2012-13 .It provides details of estimated area under nine principal crops for three season's viz. Kharif, Rabi and summer and also the land use statistics for the year 2012-13 and 2011-12. These estimates of area under nine Principal Crops are facilitating timely and quick release of results by the Government of India for each season. The estimates are based on 20 percent sample villages and results compared with the final figures arrived at through Jamabhanti by the end of the fasli year.

The co-operation extended by Revenue officials particularly Village Administrative Officers for the timely publication of this report is gratefully acknowledged. The strenuous efforts put forth by the Deputy Directors of Statistics and their field staffs in the districts for the timely completion are commended. The Staff and Officers in the Head Quarters who have involved in tabulation, analysis and report writing deserve appreciation.

Suggestions for improvement of this report are welcome.

Place : Chennai-6.

Date : 24.10.2014

TABLES

TIMELY REPORTING SCHEME

1. INTRODUCTION

1.1 GENESIS OF THE SURVEY

The Timely Reporting scheme was introduced in Tamil Nadu during the year 1972-73 as a Centrally Sponsored Scheme for the purpose of Timely Assessment of Area sown under nine Principal crops viz., Paddy, Jower, Bajra, Ragi, Cotton, Groundnut, Sugarcane, Potato and Onion at a particular period of time when it was keenly felt while formulating Agriculture Policies and Programmes both at State and Central level. At the initial stage, this scheme was implemented in all the districts of Tamil Nadu (excluding Chennai, The Nilgiris and Kanyakumari Districts). Subsequently, the scheme was extended to The Nilgiris and Kanyakumari districts excluding Chennai district in the year 1974 -75 and is being continued thereafter every year. Apart from area statistics under 9 principal crops, particulars of area under Land utilization were also collected from the Timely Reporting Scheme villages since 1980-81 in order to send quick estimates of area and Land use statistics to Government of India. Considering the importance of the scheme, the Government of Tamil Nadu declared TRS as a programme of National importance in the year 2002-03 vide G.O.M.S.No.97, Dt:16.08.2002.

1.2 FINANCIAL ASSISTANCE & ORGANISATION

The entire cost of the scheme was met by the Government of India upto the year 1978-79. Subsequently, it was restructured as a shared scheme between state and central government on 50:50 basis. From the year 2003-04 centrally sponsored schemes (i)TRS, (ii) ICS, (iii)CES on F&V have been merged into one umbrella type scheme namely "**Improvement of Agricultural Statistics**" as its components. At state level the execution and administration of the scheme are vested with the Department of Economics and Statistics, of states concerned. In Tamil Nadu state, it is under the control of the Principal Secretary/Commissioner of Economics and Statistics. Now, again from the year 2007-08, Government of India has fully funded for this scheme.

1.3 OBJECTIVES

The objectives of the Timely Reporting Scheme are

1. To workout reliable and accurate estimates of area under 9 principal crops at the end of each season viz. Kharif, Rabi and Summer.
2. To workout break up estimates of area separately for irrigated and un-irrigated and seed variety wise i.e., high yielding and local varieties.
3. To build up Land Use Statistics.

1.4 COVERAGE

The scheme is implemented in all the districts of Tamil Nadu excluding Chennai District and the principal crops viz. Paddy, Jowar, Bajra, Ragi, Cotton, Groundnut, Sugarcane, Potato and Onion are covered under this survey.

1.5 SOURCE OF DATA

The village accounts maintained by the Village Administrative Officers at the village level are the primary source of Agricultural Statistics. The Village Administrative Officers carry out area enumeration at the field level every month. The village wise data thus collected form the basis for generation of various reports related to Agricultural Statistics.

1.6 SAMPLING DESIGN AND SAMPLE SIZE

A stratified random sampling technique was adopted with block as stratum and the revenue village as ultimate unit of selection. Each year 20 percent non overlapping sample villages are selected at random, so that all the villages in the state are covered in one round extending over a period of five years. The survey year 2012-2013 is the 1st year of the Ninth round. District wise number of villages selected is furnished in Table – 6.1

1.7 SUPERVISION BY REVENUE STAFF

In order to ensure accuracy in recording of area enumeration in the village records, Revenue officials not lower than the rank of Tahsildar have also been involved as the Supervisors and they have been fixed target for inspection of five Timely Reporting Scheme Villages in each season minimum 10 Survey numbers / Sub Division numbers in each village.

2. PLAN OF WORK

2.1 PLAN OF WORK

Out of 17289 revenue villages, 3458villages have been selected during the year 2012-13 as 20 percent sampling and the list communicated well in advance to all Tahsildars and Deputy Directors of Statistics of the districts. The Village Administrative Officers of those selected villages have been requested to assemble at the Taluk Office with relevant records on 28th October, 28th January and 28th March for Kharif, Rabi and summer seasons respectively and furnish the relevant data on area sown under 9 important crops during the months of the concerned season. The filled in schedules thus collected are verified with the related village records and forwarded to the Department of Economics and Statistics within the prescribed cut off dates. The data thus collected are scrutinized, tabulated and analysed. The estimates of area under 9 principal crops are prepared at the Head Quarters and sent to the Economic and Statistical Advisor, Government of India, New Delhi and to the State Government. Land utilization particulars for the year 2012-13 are also collected and estimates are prepared at the Head Quarters and sent to the Economic and Statistical Advisor, Government of India, New Delhi and to the State Government

2.2 PERIOD OF AREA ENUMERATION

The period covered for each season and the date of completion of area enumeration are furnished in the statement given below:

STATEMENT SHOWING THE DURATION OF MONTHS AND DATE OF COMPLETION OF AREA ENUMERATION

Season	Months	Duration (No. of months)	Date Of Completion Of Area Enumeration
1. Kharif	July to October	4	25 th October
2. Rabi	November to January	3	25 th January
3. Summer	February and March	2	25 th March

Note: The area sown under the principal crops during the months of April, May and June are brought into the account in the month of July, thus covering the entire area for each agricultural year.

2.3 TIME SCHEDULE FOR SENDING ESTIMATES

Estimates of area under principal crops are worked out for each season separately. The due dates fixed for sending the estimates to the Economic and Statistical Adviser, Government of India and the actual date of furnishing the estimates are furnished below:

**TIME SCHEDULE PRESCRIBED FOR SENDING ESTIMATES TO
GOVERNMENT OF INDIA**

Season	Due Date	Date on which sent
1. Kharif	20.11.2012	20.11.2012
2. Rabi	15.02.2013	15.02.2013
3. Summer	15.04.2013	15.04.2013

3. ESTIMATION PROCEDURE

Based on the 20 Percent sample data, total area for each of the principal crops for each season for the year 2012-13 were estimated by adopting unbiased sampling method.

UNBIASED ESTIMATES

The formula adopted for estimating the area and its sampling error is given below.

Let L be the number of blocks (Stratum) in a district. In the i^{th} stratum ($i = 1, 2, 3, 4, \dots, L$) let there be N_i villages, out of which n_i are selected for estimation of area under principal crops.

Let the area under a principal crop in j^{th} selected village ($j = 1, 2, \dots, n_i$) of the i^{th} stratum be x_{ij} under a crop.

Where,

$$P_i = \frac{A_i}{x_i} \sum_{j=1}^{n_i} x_{ij}$$

P_i = Estimated area for the i^{th} stratum where ($i = 1, 2, 3, \dots, L$) and L is the number of blocks in each district.

A_i = Geographical area in i^{th} Stratum

X_i = Geographical area of the selected villages in the i^{th} Stratum

X_{ij} = Area under principal crop in the j^{th} village of the i^{th} Stratum.

The estimate of the area under crop for the entire district (d) will be

$$P_d = + \sum_{i=1}^n P_i$$

Where n = No. of blocks in a district

The variance of estimate P_d is given by

$$V(P_d) = \sum_{i=1}^L N_i^{-2} \left(\frac{1}{n_i} - \frac{1}{N_i} \right) S^2$$

Where N_i = Total no. of villages in the i^{th} stratum

n_i = Total no. of villages selected in the i^{th} stratum

Where

$$S^2_{ix} = \frac{1/n_{i-1}}{n_i} \left[\sum_{j=1}^{n_i} x_{ij}^2 - \frac{\left(\sum_{j=1}^{n_i} x_{ij} \right)^2}{n_i} \right]$$

S^2_{ix} = Sample variance for a principal crop in a district. The percentage of sampling error of the estimate of area in a district for a particular crops is obtained as follows.

$$\% \text{ S.E.} = \frac{\text{S.E. of the estimate}}{\text{estimated area}} \times 100$$

4. RESULTS

4.1 ESTIMATES OF AREA

The estimates of area relating to Paddy, Jowar, Bajra, Ragi, Cotton, Sugarcane, Groundnut, Potato and Onion were worked out separately for all three seasons. Crop-wise estimates of area for (a) Kharif (b) Kharif and Rabi (c) Kharif, Rabi and summer seasons for the year 2012-13 are presented in Table No. 6.2 of the Annexure.

4.2 SAMPLING ERROR

District-wise / Crop-wise area related to Kharif, Rabi, and Summer and their sampling errors are furnished in Table No-6.3 of the Annexure.

4.3 LAND USE STATISTICS

Data relating to Land Use Statistics under nine-fold classification were collected from the village records under Timely Reporting Scheme. Based on these data, estimates of area under nine-fold classification were projected and the data furnished in Table No.6.4 of the Annexure.

5. FINDINGS

5.1 COMPARISON OF ESTIMATES WITH SEASON AND CROP REPORT FIGURES

Timely Reporting Scheme area estimates of the 9 Principal Crops for the year 2012-13 are compared with the final figures of Season and Crop report 2012-13 in the following Table.

(In' 00 hec.)

	CROP	TRS ESTIMATES	SEASON & CROP REPORT	% DIFFERENCE
1.	Paddy	16044	14933	7.44
2.	Jowar	2298	2109	8.96
3.	Bajra	489	429	13.98
4.	Ragi	744	703	5.83
5.	Cotton	1423	1332	6.83
6.	Groundnut	3384	3394	-0.295
7.	Sugarcane	3570	3484	2.47
8.	Potato	108	43	151.16
9.	Onion	314	240	30.83

The above table indicates that the 2012-13 Timely Reporting Scheme estimates of area for 9 Principal Crops have showed a higher side for all crops. 151.16% increase is noted for Potato compared with Season and Crop report Onion for 30.83%, Bajra, Jowar and Paddy for 13.98%, 8.96% & 7.44% respectively.

5.2 DISTRICT WISE ESTIMATES – A CROP WISE COMPARISON WITH SEASON AND CROP REPORT

1. Paddy: When comparing the estimated area of Timely Reporting Scheme with Season and Crop Report presented in Table 6.5, the increased percentage variation of **275.70%** is high in Coimbatore District and **0.25%** low in Dindigul District. The decreased variation of **-1.91%** is high in Kancheepuram District and **-32.87%** low in Perambalur District. **The State level average variation of 7.14%** is calculated against Season and Crop Report.

2. Jowar: Regarding Jowar, the increased percentage variation is high in Cuddalore District and **0.05%** low in Coimbatore District. The decreased percentage variation **-1.26%** is high in Thirchirapalli District and **-39.82%** low in Salem District. **The State level average variation of 8.96%** is calculated against Season and Crop Report.

3. Bajra: For Bajra the increased percentage variation of 400% is high in Coimbatore District and **0.65%** low in Virudhanagar District. The decreased percentage variation of -13.92% is high in Thoothukudi District and **-100%** low in Namakkal, Erode, Tirunelveli & Tiruppur Districts respectively. **The State level average variation of 13.98%** is calculated against Season and Crop Report.

4. Ragi: For cotton the increased percentage variation of **400%** is high in Cuddalore District and **44.93%** low in Thiruvallur District. The decreased percentage variation of **-9.39%** is high in Salem and **-100%** low in Namakkal, Coimbatore, Madurai, Virudhunagar, Tirunelveli, Thoothukudi. **The State level average variation is 5.84%** is calculated against Season and Crop Report.

5. Cotton: For Cotton the increased percentage variation of **210.56%** is high in Sivagangai District and **0.57%** low in Erode District. The decreased percentage variation of **-4.82%** is high in Ramanathapuram District and **-64.16 %** low in Coimbatore District. **The State level average variation is 6.82%** is calculated against Season and Crop Report.

6. Groundnut: For Groundnut the increased percentage variation of **141.38%** is high in Theni District and **2.56%** low in Sivagangai district. The decreased percentage variation of **-1.19%** is high in Ariyalur District and **-68.62%** low in Tiruppur District. **The State level average variation of -0.28%** is calculated against Season and Crop Report.

7. Sugarcane: For Sugarcane the increased percentage variation of **111.86%** is high in Ramanathapuram District and **53.17%** low in Thoothukudi district. The decreased variation of **-0.68%** is high in Villupuram District and **44.33%** low in Namakkal District. **The State average variation of 2.40 %** is calculated against Season and Crop Report.

8. Potato: For Potato the increased percentage variation of **301.44%** is high in Dindugul District and **0.25%** low in The Nilgiris district. The Krishnagiri district shows **-14.35%** decreased percentage variation. **The State average variation is calculated as -10.12%** is calculated against Season and Crop Report.

9. Onion: For Onion the increased percentage variation is high in Ramanathapuram District and **7.48%** low in Perambalur district. The decreased variation of **-5.21%** is high in Dharmapuri District and **-100%** low in Krishnagiri & Ariyalur District. **The State average variation of 1.39 %** is calculated against Season and Crop Report.

**5.3 COMPARISON OF NINE FOLD CLASSIFICATION ESTIMATES WITH SEASON
AND CROP REPORT FIGURES 2012-13**

Category	TRS	Season & Crop Report	(In hectare)
			% Variation
Forest	2122631	2125175	-0.5
Barren and uncultivable land	488028	488512	-0.6
Land put to non-agricultural uses	2165408	2167105	0
Cultivable waste	327632	328026	-1
Permanent pastures and other grazing lands	109481	109568	-0.1
Miscellaneous tree crops and groves not included in the net area sown	247532	249544	-0.8
Current fallow Lands	1476373	1308159	12.9
Other fallow lands	1804674	1695689	6.4
Net area sown	4570471	4544240	4.0
Total geographical area	13025119	13016018	1.9

The above table shows some differences in the estimates of Timely Reporting Scheme with Season and Crop Report regarding Current fallow lands increase is noted (12.9%) and other follow lands increase is noted (6.4%). Similarly increase is noted in the net area sown as 4%. As per TRS report the total geographical area is slightly lower than that of Season and Crop Report (1.9%)

Conclusion

The area estimates framed under Timely Reporting Scheme help us to have the area sown at particular point of time. These estimates are used to get the advanced estimates of food production and from formulate agricultural policies and development programmes at State and Nation levels.

Thus, Timely Reporting Scheme achieved its object by providing advance information on area under nine principal crops with season wise fairly representative estimates during 2012-13.

6.1 STATUS REPORT

6.1 RESPONSE

Out of 17289 villages, 20 percent namely 3458 villages have been planned for the year 2012-13 and schedules were received fully for kharif, rabi and summer seasons within the cut off date.

STATEMENT SHOWING THE NUMBER OF VILLAGES SELECTED AND RECEIPT OF FORMS IN EACH SEASON
