

## Building Construction Cost Index Numbers of Tamilnadu

Quarter Ended: 30.09.2021

**DEPARTMENT OF ECONOMICS AND STATISTICS**

**CHENNAI – 600 006**

## **Preface**

Housing and building construction statistics is of prime importance in the fast economy. Next to agriculture, construction is the major employment generator in the unorganized sector.

The Quarterly Report on Building Construction Cost Index for the quarter ended 30.09.2021 provides Building Construction Cost Index with base 2011-12=100 for 16 centres in Tamil Nadu. This report is 2<sup>nd</sup> in series after shifting of base year from 1999-2000 to 2011-12.

The Building Construction Cost Index shows the trend in the building construction cost (mainly cost of material and wages of labour at a specified centre over a period of time).

The Building Construction Cost Index is being compiled quarterly for 16 centres of Tamil Nadu as per the methodology furnished by National Building Organisation, MOHUA, New Delhi.

I hope this report would be useful to the Administrators, Research scholars, Planners, Economists and other organisations of both Public and Private.

Suggestions and comments are solicited from the users of this report for improving the content in the future publications.

## **1. INTRODUCTION**

Housing and Building Construction is one of the most important sector of the economy. Housing and housing related infrastructure indicators in a country is the reflection of a nation's economic and social well-being.

Building construction cost varies with type of construction, design, region, etc. Therefore, in order to study these variations, it is necessary to compile the building cost index numbers for well-demarcated regions within which the design, construction techniques and materials used are similar.

Building Construction Cost Index depicts the trends in the building construction cost at a specified centre over a period of time (Base year to current year). The cost of a building structure comprises mainly of the cost of material and labour.

### **Coverage:**

The Building Construction Cost Index with base 2011-12=100 is compiled Quarterly for 16 centres of Tamil Nadu, viz., Chennai, Kancheepuram, Vellore, Cuddalore, Thanjavur, Dharmapuri, Salem, Tiruchirapalli, Coimbatore, Erode, Udhagamandalam, Madurai, Pudukottai, Kanyakumari, Tirunelveli, Virudhunagar.

## **Methodology:**

The Quarterly Building Construction Cost Index is compiled as per the methodology provided by National Building Organisation, New Delhi.

The Index prepared on the basis of standard requirement of all types of materials and their cost for a standard LIG housing unit by TN State Housing Board i.e., it related to construction of LIG house measuring 330 sq.ft.

The index consists of three groups, viz., material cost, labour cost and other expenses. It covers 60 items under material cost, 10 items under labour cost and 4 items under other expenses.

Weights assigned to each item included in the index in proportion of their expenditure to the total cost of base year.

The index is the weighted Arithmetic Mean calculated by using the formula,

$$\text{Index} = \frac{\sum_{j} W_{ij} * P_j}{\sum_{j} W_{ij}} * 100$$

W<sub>ij</sub> is the weight of the item

P<sub>j</sub> is the relative Cost of the item (current/constant cost)

The index is calculated at sub group level, next at group level and finally for all the groups combined Building Construction Cost Index.
