TIMELY REPORTING SCHEME

1. INTRODUCTION

1.1 GENESIS OF THE SURVEY

The Timely Reporting scheme was introduced in Tamil Nadu during the year 1972-73 as a Centrally Sponsored Scheme for the purpose of Timely Assessment of Area sown under nine Principal crops viz., Paddy, Jowar, Bajra, Ragi, Cotton, Groundnut, Sugarcane, Potato and Onion at a particular period of time when it was keenly felt while formulating Agriculture Policies and Programmes both at State and Central level. At the initial stage, this scheme was implemented in all the districts of Tamil Nadu (excluding Chennai, The Nilgiris and Kanyakumari Districts). Subsequently, the scheme was extended to The Nilgiris and Kanyakumari districts excluding Chennai district in the year 1974 -75 and is being continued thereafter every year. Apart from area statistics under 9 principal crops, particulars of area under Land utilization were also collected from the Timely Reporting Scheme villages since 1980-81 in order to send quick estimates of area and Land use statistics to Government of India. Considering the importance of the scheme, the Government of Tamil Nadu declared TRS as a programme of National importance in the year 2002-03 vide G.O.M.S.No.97, Dt:16.08.2002.

1.2 FINANCIAL ASSISTANCE & ORGANISATION

The entire cost of the scheme was met by the Government of India upto the year 1978-79. Subsequently, it was restructured as a shared scheme between state and central government on 50:50 basis. Now, from the year 2007-08, Government of India has fully funded this scheme. From the year 2015-16 central sector schemes namely, (i) TRS, (ii) ICS, (iii) Agriculture Census have been merged into one umbrella type scheme namely “**Improvement of Agricultural Statistics**” as its components. At state level the execution and administration of the scheme are vested with the Department of Economics and Statistics, of states concerned. In Tamil Nadu state, it is under the control of the Commissioner of Economics and Statistics.

1.3 OBJECTIVES

The objectives of the Timely Reporting Scheme are

- To workout reliable and accurate estimates of area under 9 principal crops at the end of each season viz. Kharif, Rabi and Summer.
- To workout break up estimates of area separately for irrigated and un-irrigated and seed variety wise i e., high yielding and local varieties.
- To build up Land Use Statistics.

1.4 COVERAGE

The scheme is implemented in all the districts of Tamil Nadu and the nine principal crops viz. Paddy, Jowar, Bajra, Ragi, Cotton, Groundnut, Sugarcane, Potato and Onion are covered under this scheme.

1.5 SOURCE OF DATA

The village accounts maintained by the Village Administrative Officers at the village level are the primary source of Agricultural Statistics. The Village Administrative Officers carry out area enumeration at the field level every month. The village wise data thus collected form the basis for generation of various reports related to Agricultural Statistics.

1.6 SAMPLING DESIGN AND SAMPLE SIZE

A stratified random sampling technique was adopted with block as stratum and the revenue village as ultimate unit of selection. Each year 20 percent non overlapping sample villages are selected at random, so that all the villages in the state are covered in one round extending over a period of five years. The scheme for the year 2021-22 is the 5th year of the Tenth round. District wise number of villages selected is furnished in Table – 6.1.

1.7 SUPERVISION BY REVENUE STAFF

In order to ensure accuracy in recording of area enumeration in the village records, Revenue officials not lower than the rank of Tahsildar have also been involved as the Supervisors and they have been fixed target for inspection of five Timely Reporting Scheme Villages in each season minimum 10 Survey numbers / Sub Division numbers in each village.

2. PLAN OF WORK

Out of 17398 revenue villages, 3481 villages were selected during the year 2021-2022 as 20 percent sampling and the list was communicated well in advance to all Tahsildars and Deputy Directors of Statistics of the districts. The Village Administrative Officers of those selected villages were requested to assemble at the Taluk Office with relevant records on 28th October, 28th January and 28th March for Kharif, Rabi and summer seasons respectively and furnish the relevant data on area sown under 9 important crops during the months of the concerned season.

The filled in schedules thus collected were verified with the related village records and forwarded to the Department of Economics and Statistics within the prescribed cut off dates. The data thus collected were scrutinized, tabulated and analysed. The estimates of area under 9 principal crops were prepared at the Head Quarters and sent to the Economic and Statistical Advisor, Government of India, New Delhi and to the State Government. Land utilization particulars for the year 2021-22 were also collected and estimates were prepared at the Head Quarters and sent to the Economic and Statistical Advisor, Government of India, New Delhi and to the State Government.

1 PERIOD OF AREA ENUMERATION

The period covered for each season and the date of completion of area enumeration are furnished in the statement given below:

Season	Months	Duration (No. of months)	Date Of Completion Of Area Enumeration
1. Kharif	July to October	4	25 th October
2. Rabi	November to January	3	25 th January
3. Summer	February and March	2	25 th March

Note: The area sown under the principal crops during the months of April, May and June are brought into the account in the month of July, thus covering the entire area for each agricultural year.

2 TIME SCHEDULE FOR SENDING ESTIMATES

Estimates of area under nine principal crops were worked out for each season separately. The due dates fixed for sending the estimates to the Economic and Statistical Adviser, Government of India and the actual date of furnishing the estimates are furnished below:

TIME SCHEDULE PRESCRIBED FOR SENDING ESTIMATES TO GOVERNMENT OF INDIA

Season	Due Date
1. Kharif	05.11.2021
2. Rabi	05.02.2022
3. Summer	05.04.2022

3. ESTIMATION PROCEDURE

Based on the 20 Percent sample data, total area for each of the principal crops for each season for the year 2021-22 were estimated by adopting unbiased sampling method.

UNBIASED ESTIMATES

The formula adopted for estimating the area and its sampling error is given below.

Let L be the number of blocks (Stratum) in a district. In the i^{th} stratum ($i = 1, 2, 3, 4, \dots, L$) let there be N_i villages, out of which n_i are selected for estimation of area under principal crops.

Let the area under a principal crop in j^{th} selected village ($j = 1, 2, \dots, n_i$) of the i^{th} stratum be x_{ij} under a crop.

Where,

$$P_i = \frac{A_i}{x_i} \sum_{j=1}^{n_{ij}} x_{ij}$$

P_i = Estimated area for the i^{th} stratum where ($i = 1, 2, 3, \dots, L$) and L is the number of blocks in each district.

A_i = Geographical area in i^{th} Stratum

X_i = Geographical area of the selected villages in the i^{th} Stratum

X_{ij} = Area under principal crop in the j^{th} village of the i^{th} Stratum.

The estimate of the area under crop for the entire district (d) will be

$$Pd = + \sum_{i=1}^n P_i$$

Where n = No. of blocks in a district

The variance of estimate Pd is given by

$$V(p_d) = \sum_{i=1}^L N_i^2 \left(\frac{1}{n_i} - \frac{1}{N_i} \right) S^2_{ix}$$

Where N_i = Total no. of villages in the i^{th} stratum

n_i = Total no. of villages selected in the i^{th} stratum

Where

$$S^2_{ix} = \frac{1}{n_i - 1} \left[\sum_{j=1}^{n_i} x^2_{ij} - \frac{\left(\sum_{j=1}^{n_i} x_{ij} \right)^2}{n_i} \right]$$

S^2_{ix} = Sample variance for a principal crop in a district. The percentage of sampling error of the

Estimate of area in a district for a particular crops is obtained as follows.

$$\% \text{ S.E.} = \frac{\text{S.E. of the estimate}}{\text{Estimated area}} \times 100$$

Estimated area

4. RESULTS

4.1 ESTIMATES OF AREA

The estimates of area relating to Paddy, Jowar, Bajra, Ragi, Cotton, Sugarcane, Groundnut, Potato and Onion were worked out separately for all three seasons. Crop-wise estimates of area for (a) Kharif (b) Kharif and Rabi (c) Kharif, Rabi and summer seasons for the year 2021-22 are presented in Table No. 6.2 of the Annexure.

4.2 SAMPLING ERROR

District-wise / Crop-wise area related to Kharif, Rabi, and Summer and their sampling errors are furnished in Table No-6.3 of the Annexure.

4.3 LAND USE STATISTICS

Data relating to Land Use Statistics under nine-fold classification were collected from the village records under Timely Reporting Scheme. Based on these data, estimates of area under nine-fold classification were projected and the data furnished in Table No.6.4 of the Annexure.

5. FINDINGS

5.1 COMPARISON OF ESTIMATES WITH SEASON AND CROP REPORT FIGURES

The area estimates under Timely Reporting Scheme in respect of the 9 Principal Crops for the year 2021-22 are compared with the final figures of Season and Crop report 2021-22 in the following Table.

(In' 00 hec.)

CROP	TRS	S&C	% of Variation
PADDY	22152	22168	-0.07
JOWAR	3925	3972	-1.18
BAJRA	554	600	-7.67
RAGI	695	744	-6.59
COTTON	1400	1479	-5.34
GROUNDNUT	3538	3724	-4.99
SUGARCANE	1472	1480	-0.54
POTATO	75	47	59.57
ONION	567	551	2.90

The above table indicates that the estimates of area for Nine Principal Crops under Timely Reporting Scheme for the year 2021-22 in Tamil Nadu have shown a lower side for almost all the crops, excepting Potato and Onion crops.

A large variation is noticed in the area of Potato (59.57%) when comparing the area of Season and Crop report. All the other crops have shown less than 10% variation.

5.2 DISTRICT WISE ESTIMATES – A CROP WISE COMPARISON WITH SEASON AND CROP REPORT

1. Paddy

Paddy is the most important cereal crop cultivated in 22.15 lakh hectares of area during 2021-22. The major paddy growing districts are Thanjavur (9.33%), Thiruvarur (9.14%), Nagapattinam (8.94%), Thiruvannamalai (8.08%), Ramanathapuram(7.04%), Cuddalore (6.18%) and Villupuram(5.07%) which account for nearly 53.78% of the total Paddy area of the State. About 63.42% of the area under the crop was covered in Kharif season alone.

District wise estimates of area as per Timely Reporting Scheme and Season & Crop report are presented in Table 6.5. Compared to Season and Crop report, the estimated area of Paddy for the state under TRS was slightly lower. The State level average variation is -0.07%.

2. Jowar

Jowar is another cereal crop grown in 3.92 lakh hectares of area in the year 2021-22. The area covered under the crop is more in Namakkal (21.25%) followed by Salem (15.00%), Dindigul (11.11%), Tiruppur (8.79%) Tiruchirapalli (8.15%) and Dharmapuri (7.80%) districts. These districts alone contributed a share of nearly 72.10% to the total area of the crop in the state.

District wise estimates of area as per Timely Reporting Scheme and Season & Crop report are presented in Table 6.5. Compared to Season and Crop report, the state level variation of area under TRS was slightly lower at -1.18%.

3. Bajra

Bajra was grown in 0.55 lakh hectares of area during 2021-22 which is comparatively less in the state. The major Bajra growing districts are Kallakurichi(29.78%), Villupuram (19.67%), and Thoothukudi (15.16%) which put together contribute 64.62% to the total Bajra area of the State. It is significant to note that about 80.32% of the area under the crop was covered in Kharif season alone.

Compared to Season and Crop report, the estimated area of Bajra for the state under TRS is lower. The State level average variation is -7.67%. The details of district wise variations are provided in table 6.5.

4. Ragi

Ragi was grown in 0.69 lakh in the State during the year under report. It is largely grown in Krishnagiri (57.12%) and followed by Dharmapuri (17.41%), and Salem (7.63%) districts in the State. These 3 districts alone contribute 82.16% of cropped area of the ragi crop. About 81.87% of the area under the ragi crop was covered exclusively in Kharif season itself.

Area estimated under the crop by Timely Reporting scheme was lower compared to the Season and Crop report. A comparison with Season and Crop report reveals the state level variation of area under TRS was -6.59%. District wise estimates of area as per Timely Reporting Scheme & Season and Crop report are shown in Table 6.5.

5. Cotton

Cotton is an important cash crop largely grown in Viruthunagar (13.57%), Thiruvarur (8.64%), Perambalur (8.36%), Ramanathapuram (7.93%), Madurai (7.57%) and Thiruchirapalli (7.43%) districts . In the State, 1.40 lakh hectares of area was covered under the cotton crop during 2021-22.

Compared to the Season and Crop report, it is to be noted that the state level variation of area under TRS is lower at -5.34%. District wise estimates of area as per Timely Reporting Scheme and Season & Crop report are presented in Table 6.5.

6. Groundnut

Groundnut is a prominent oil seed crop grown in about 3.53 lakh hectares in the State. It is of interest to note that about 67.78% of the area under the crop was covered in Kharif season alone. Predominant groundnut growing districts are Thiruvannamalai (20.12%), Namakkal (10.60%), Villupuram (7.77%), and Salem (6.87%), which accounted for 45.36% of the State.

Compared to the Season and Crop report, the state level variation of area under TRS is -4.99%. District wise estimates of area as per Timely Reporting Scheme and Season & Crop report are detailed in Table 6.5

7. Sugarcane

Out of 1.47 lakh hectares of area under the crop, a considerable portion of 15.96% of cropped area is found in the Erode district alone. The other important sugarcane growing districts in the State are Kallakurichi(14.54%), Cuddalore (11.55%), Thiruvannamalai (11.28%) and Villupuram (9.44%).

District wise details of estimates are shown in table 6.5. The State average variation of -0.54% is calculated against Season and Crop report.

8. Potato

Potato is cultivated in 7500 hectares of area during 2021-22 which is comparatively minimum in the State. It is largely grown in Dindigul(70.67%), The Nilgiris (21.33%), Erode and Krishnagiri (4.00%) districts in the State. These 4 districts together contribute 100% of cropped area of the potato crop.

Area estimated under the crop by Timely Reporting scheme is high compared to the Season and Crop report. The state level variation of area under TRS is - 59.57%.

About 60% of the area under the crop was covered in Kharif season alone. District wise estimates of area as per Timely Reporting Scheme and Season & Crop report are provided in Table 6.5.

9. Onion

Onion was grown in the minimum area of 0.56 lakh hectares during 2021-22 in the state. The major Onion growing districts are Thiruchirapalli (17.99%),Perambalur (13.23%), Thiruppur (10.05%), Thoothukudi (9.70%) and Namakkal (9.17%) which account for 60.14% of the total onion area of the State. Area estimated under the crop by Timely Reporting scheme was higher compared to the Season and Crop report. The state level variation of area under TRS is 2.90 %.

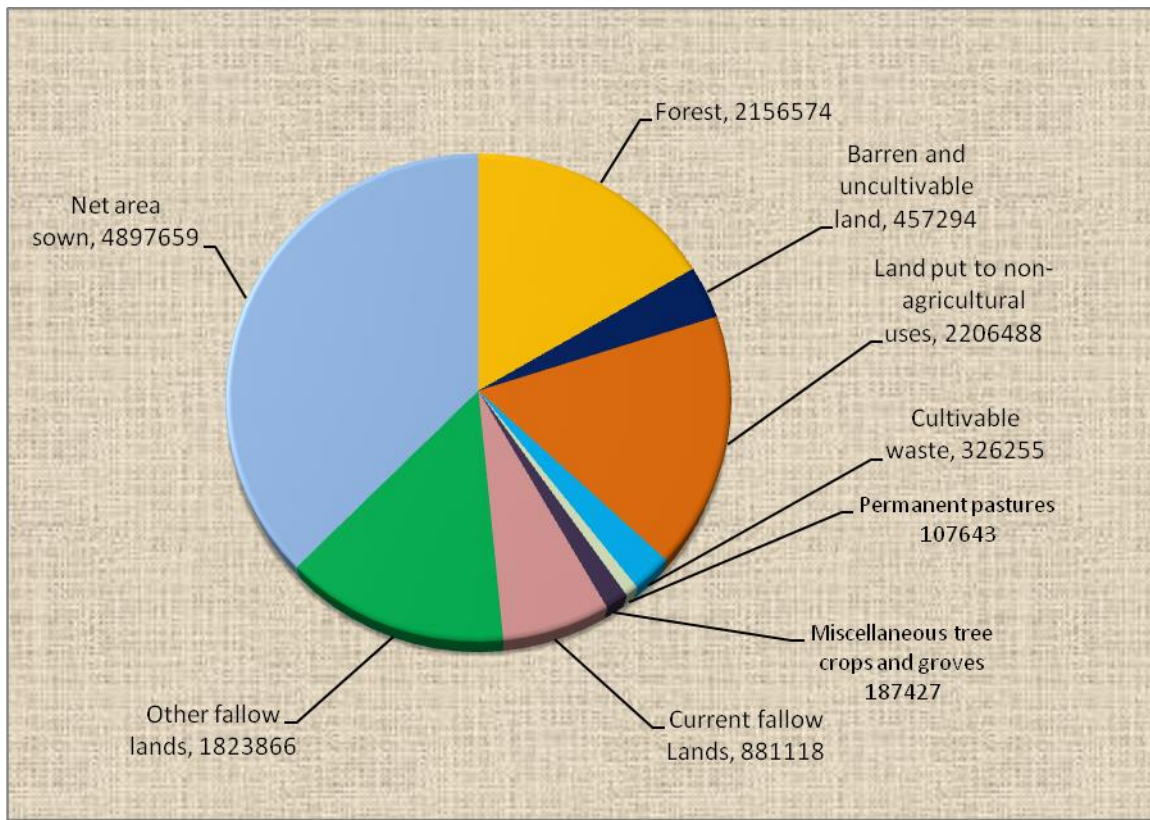

District wise estimates of area as per Timely Reporting Scheme and Season & Crop report are presented in Table 6.5.

5.3 COMPARISON OF NINE FOLD CLASSIFICATION ESTIMATES WITH SEASON AND CROP REPORT FIGURES 2021-22.

The area estimates under Timely Reporting Scheme for current fallow lands was 881118 as against the area of 800455 hectares recorded in the season and crop report, registering a substantial increase of 10.07 %. On the other hand, the estimates pertaining to Net area Sown and Other Fallow lands under TRS show a decrease of -0.23% and -2.13% respectively as against the area reported in the season and crop report.

(area in hect)

Category	TRS 2021-22	Season & Crop Report (2021-22)	% Variation
Forest	2156574	2156574	0.00
Barren and uncultivable land	457294	457234	0.01
Land put to non-agricultural uses	2206488	2206192	0.01
Cultivable waste	326255	346364	-5.80
Permanent pastures and other grazing lands	107643	107641	0.00
Miscellaneous tree crops and groves not included in the net area sown	187427	186070	0.73
Current fallow Lands	881118	800455	10.08
Other fallow lands	1823866	1863648	-2.13
Net area sown	4897659	4908938	-0.23
Total geographical area	13044324	13033116	0.09

Conclusion:

The area estimates framed under Timely Reporting Scheme help us to have the area sown detail at particular point of time. These estimates are used to get the advanced estimates of food production and from these we can formulate agricultural policies and development programmes at State and National levels.

Thus, Timely Reporting Scheme achieved its object by providing advance information on area under nine principal crops with season wise fairly representative estimates during 2021-22.

6.1 STATUS REPORT

6.1 RESPONSE

Out of 17398 villages, 20 percent namely 3481 villages have been planned for the year 2021-22 and Schedules were received fully for Kharif, Rabi and Summer seasons within the cut off date.
